In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The ICR documentation will be available at <https://www.reginfo.gov> upon its submission to OMB. Therefore, in preparation for OMB review and approval of the following information collection, TSA is soliciting comments to—

(1) Evaluate whether the proposed information requirement is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including using appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Information Collection Requirement

OMB Control Number 1652-0058; Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery. This information collection provides a means to gather qualitative customer and stakeholder feedback in

an efficient, timely manner, in accordance with the Administration's commitment to improving service delivery.

From the TSA perspective, qualitative customer and stakeholder feedback provides useful insights on perceptions and opinions. Unlike the results of statistical surveys, which yield quantitative results that can be generalized to the population of study, this qualitative feedback provides insights into customer or stakeholder perceptions, experiences, and expectations regarding TSA products or services. Such feedback also provides TSA with an early warning of issues with service, and focuses attention on areas where improvement is needed regarding communication, training, or changes in operations that might improve delivery of products or services. These collections allow for ongoing, collaborative, and actionable communications between the Agency and its customers and stakeholders. They also allow feedback to contribute directly to the improvement of program management. The solicitation of feedback targets areas such as: timeliness, appropriateness, accuracy of information, courtesy, efficiency of service delivery, and resolution of issues with service delivery. Responses are assessed to plan and inform efforts to improve or maintain the quality of service offered by TSA. If this information is not collected, vital feedback from customers and stakeholders on the Agency's services will be unavailable.

The Agency will only submit a collection for approval under this generic clearance if it meets the following conditions:

- The collections are voluntary.
- The collections are low-burden for respondents (based on considerations of total burden hours, total number of respondents, or burden-hours per respondent) and are low-cost for both the respondents and the Federal Government.
- The collections are noncontroversial and do not raise issues of concern to other Federal agencies.
- Any collection is targeted to the solicitation of opinions from respondents who have experience with the program or may have experience with the program in the near future.
- Personally identifiable information is collected only to the extent necessary and is not retained.

As a general matter, information collections will not result in any new system of records containing privacy information and will not ask questions of a sensitive nature, such as sexual

behavior and attitudes, religious beliefs, or other matters that are commonly considered private.

The aggregate burden estimate is based on a review of past behavior of participating program offices and several individual office estimates. The likely respondents to this proposed information request are State, Local, or Tribal government and law enforcement; the traveling public; individuals and households; and businesses and organizations. TSA estimates an average of 10 annual surveys with approximately 7,094,500 responses total. TSA further estimates a frequency of one response per request, with an average response time of 10 to 30 minutes, resulting in an estimated annual hour burden of 1,180,050 hours. TSA will provide more refined individual estimates of burden in its subsequent generic information collection applications.

Dated: December 2, 2024.
