l. *Description of Request:* The co-licensees propose to: (1) relocate the existing primary transmission line away from property retained by the former licensee within the vicinity of the Gambo Project and (2) affect a new interconnection with the neighboring electric utility. As a part of these modifications to the primary transmission line, the co-licensees propose to remove from the project boundaries for each of the projects the portion of the existing primary transmission line running to the S.D. Warren Paper Mill that would be obsolete upon completion of the new interconnection and to construct a new generator step-up (“GSU”) transformer within the current project boundary of the Mallison Falls Project. The proposed action would have minimal ground disturbance including the installation and removal of transmission lines poles, installation of the foundation for the transformer, and the installation of an approximately 1,400-foot-long underground cable.

¹ On July 8, 2024, and November 14, 2024, the licensee filed a notice that its name changed to Relevelate Power Maine LLC.
