BILLING CODE 6353-01-P

DEPARTMENT OF EDUCATION

[Docket No.: ED-2024-SCC-0120]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Servicemembers Civil Relief Act (SCRA): Interest Rate Limitation Request

AGENCY: Federal Student Aid (FSA), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995, the Department is proposing an extension without change of a currently approved information collection request (ICR).

DATES: Interested persons are invited to submit comments on or before January 6, 2025.

ADDRESSES: Written comments and recommendations for proposed information collection requests should be submitted within 30 days of publication of this notice. Click on this link www.reginfo.gov/public/do/PRAMain to access the site. Find this information collection request (ICR) by selecting “Department of Education” under “Currently Under Review,” then check the “Only Show ICR for Public Comment” checkbox. Reginfo.gov provides two links to view documents related to this information collection request. Information collection forms and instructions may be found by clicking on the “View Information Collection (IC) List” link. Supporting statements and other supporting documentation may be found by clicking on the “View Supporting Statement and Other Documents” link.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Beth Grebeldinger, 202-570-8414.

SUPPLEMENTARY INFORMATION: The Department is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Servicemembers Civil Relief Act (SCRA): Interest Rate Limitation Request.

OMB Control Number: 1845–0135.

Type of Review: An extension without change of a currently approved ICR.

Respondents/Affected Public: Individuals and Households.

Total Estimated Number of Annual Responses: 200.

Total Estimated Number of Annual Burden Hours: 67.

Abstract: The Servicemembers Civil Relief Act (SCRA) provides that those on active-duty military service are entitled to have an interest rate in excess of 6% be capped at 6% for the duration of their qualifying military service. The Department is requesting an extension of the currently approved information collection. These Federal Family Education Loan (FFEL) Program and Direct Loan Program regulations have not changed. The regulations require a loan holder to match its database against the Department of Defense's Defense Manpower Data Center (DMDC) and automatically apply the interest rate limitation, as appropriate, to borrowers under the Servicemembers Civil Relief Act. The form in this collection would only be used in limited cases where the borrower is not found in the Defense Manpower Data Center, or does not have a copy of military orders, but still wishes to receive benefits under the SCRA.

Dated: December 3, 2024.

Kun Mullan,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Energy Information Administration

Agency Information Collection Proposed Extension

AGENCY: U.S. Energy Information Administration (EIA), Department of Energy (DOE).

ACTION: Notice and request for comments.

SUMMARY: EIA invites public comment on the proposed three-year extension, with changes, to the Generic Clearance for Questionnaire Testing, Evaluation, and Research, as required under the Paperwork Reduction Act of 1995. EIA–882T, *Generic Clearance for*

Questionnaire Testing, Evaluation, and Research, provides EIA with the authority to utilize qualitative and quantitative methodologies to pretest questionnaires and validate the quality of data collected on EIA's surveys. EIA uses EIA–882T to meet its obligation to publish, and otherwise make available independent, high-quality statistical data to federal government agencies, state and local governments, the energy industry, researchers, and the general public.

DATES: EIA must receive all comments on this proposed information collection no later than February 4, 2025. If you anticipate any difficulties in submitting your comments by the deadline, contact the person listed in the **ADDRESSES** section of this notice as soon as possible.

ADDRESSES: You may submit comments, identified by OMB control number 1905–0186, by email at *EIA-FRNcomments@eia.gov*. Include the OMB control number listed in the subject line of the message.

FOR FURTHER INFORMATION CONTACT: Kenneth Pick, EIA Clearance Officer, at (202) 586–5562.

SUPPLEMENTARY INFORMATION: This information collection request contains:

(1) *OMB No.:* 1905–0186;

(2) *Information Collection Request*

Title: Generic Clearance for Questionnaire Testing, Evaluation, and Research;

(3) *Type of Request:* Three-year extension with changes;

(4) *Purpose:* The U.S. Energy Information Administration (EIA) is requesting a three-year approval from the Office of Management and Budget (OMB) to utilize qualitative and quantitative methodologies to pretest questionnaires and validate the quality of the data that are collected on EIA and DOE survey forms. Through the use of these methodologies, EIA will conduct research studies to improve the quality of energy data being collected, reduce or minimize survey respondent burden, and increase agency efficiency. This authority would also allow EIA to improve data collection in order to meet the needs of EIA's customers while also staying current in the evolving nature of the energy industry.

The specific methods EIA will continue to use for the coverage by this clearance are described below.

Pilot Surveys. Pilot surveys conducted under this clearance will generally be methodological studies and will always employ statistically representative samples. The pilot surveys will replicate all components of the methodological

design, sampling procedures (where possible), and questionnaires of the full-scale survey. Pilot surveys will normally be utilized when EIA undertakes a complete redesign of a particular data collection methodology or when EIA undertakes data collection in new energy areas of the energy sector where data collection would provide utility to EIA.

Cognitive Interviews. Cognitive interviews are typically one-on-one interviews in which the respondent is usually asked to “think aloud” or is asked “retrospective questions” as they answer questions, reads survey materials, defines terminology, or completes other activities as part of a typical survey process. A number of different techniques may be involved including asking respondents what specific words or phrases mean or asking respondents probing questions to determine how they estimate, calculate, or determine specific data elements on a survey. The objectives of these cognitive interviews are to identify problems of ambiguity or misunderstanding, examine the process that respondents follow for reporting information, assess survey respondents' ability to report new information, or identify other difficulties respondents have answering survey questions in order to reduce measurement error from estimates based on a survey.

Respondent Debriefings. Respondent debriefings conducted under this clearance will generally be methodological or cognitive research studies. The debriefing form is administered after a respondent completes a questionnaire either in paper format, electronically, or through personal interviews. The debriefings contain probing questions to determine how respondents interpret the survey questions, how much time and effort was spent completing the questionnaire, and whether they have problems in completing the survey/questionnaire. Respondent debriefings also are useful in determining potential issues with data quality and in estimating respondent burden.

Usability Testing. Usability tests are similar to cognitive interviews in which a respondent is typically asked to “think aloud” or asked “retrospective questions” as they review a survey questionnaire, related materials, or website. The objective of usability testing is to check that respondents can easily and intuitively navigate survey questionnaires, related materials, and websites to submit their data to EIA.

Focus Groups. Focus groups are a qualitative method used early in questionnaire development to gather
