Abstract of Information Available

Human remains representing, at least, one individual have been identified. No associated funerary objects are present. In December 2023, this individual was located by a hunter on private property in Athens-Clarke County, GA north of Athens. The hunter removed the human remains from the ground surface and brought them to the Athens-Clarke County Police Department. Once the individual was determined to not be part of a forensic case, the human remains were examined by the University of Georgia, Department of Anthropology. Skeletal measurements were taken and run through the FORDISC program indicating possible Native American ancestry. The Georgia Department of Natural Resources was notified and worked with the Athens-Clarke County Police Department to inspect the area where the human remains were found. No archaeological sites or cultural features are associated with the individual. The individual is housed in a secured facility at the Georgia Department of Natural Resources, Office of the State Archaeologist.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location of the human remains described in this notice.
