

effectiveness and adapt subsequent implementation actions and will also provide an opportunity for additional coordination with Oregon Department of Fish and Wildlife (ODFW) prior to fuel break construction along less-traveled roads. During the first phase, the BLM will focus on well-traveled routes in order to further enhance the knowledge base on successful treatment timing and techniques, ecological impacts of treatments, and adaptive management responses. Treatments and methods in Oregon will be the same as those identified and analyzed in the FEIS. Up to four new mineral material sites will be developed as the first phase of fuel break development is nearing completion.

All practicable means to avoid or minimize environmental harm from the Project that were analyzed in the FEIS have been adopted in this decision and are included as appendices. Design features provide implementation timing restrictions and other protections to minimize impacts to wildlife. These features include buffers for sensitive plant occurrences from non-native seeded species, mechanical treatment avoidance buffers to protect riparian resources, and treatment buffers no more than 200 feet from either side of centerline along roads to conform to the 2024 Southeastern Oregon Resource Management Plan Amendment, which established 250-foot setbacks for Wilderness Study Areas.

The Project includes a robust monitoring and adaptive management plan to manage invasive annual species and noxious weeds within fuel breaks, collect ecological trend data to provide information on the ecological effects of vegetative treatments, and outline appropriate management responses. The Project also includes management direction and required design features from the 2015 Oregon Greater Sage-grouse Approved Resource Management Plan Amendment, as described in Appendix 3 to the ROD. A programmatic agreement (Appendix 4 to the ROD) describes how BLM will meet its responsibilities under Section 106 of the National Historic Preservation Act and avoid or minimize adverse impacts to cultural resources during Project implementation and maintenance.

There have been no changes made to the selected alternative between the publication of the FEIS and the ROD.

The Department of the Interior has approved the BLM's decision. Approval of the Record of Decision therefore constitutes the final decision of the Department of the Interior and is not

subject to appeal under Departmental regulations at 43 CFR part 4.

Barry R. Bushue,

BLM Oregon/Washington State Director.

BILLING CODE 4331-24-P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[PO4820000251]

Notice of Availability of the Draft Environmental Impact Statement for P4 Production LLC's Caldwell Canyon Revised Mine and Reclamation Plan Project, Caribou County, Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: In compliance with the National Environmental Policy Act of 1969, as amended (NEPA), and the Federal Land Policy and Management Act of 1976, as amended (FLPMA), the Bureau of Land Management (BLM) announces the availability of the draft Environmental Impact Statement (EIS) for P4 Production LLC's (P4) Caldwell Canyon Revised Mine and Reclamation Plan Project (Project) in Caribou County, Idaho.

DATES: To afford the BLM the opportunity to consider comments in the Draft EIS, please ensure that the BLM receives your comments within 45 days following the date the Environmental Protection Agency (EPA) publishes its Notice of Availability (NOA) of the draft EIS in the **Federal Register**. The EPA usually publishes its NOAs on Fridays.

ADDRESSES: The draft EIS and associated documents are available for review on the BLM project website at <https://eplanning.blm.gov/eplanning-ui/project/2026858/510>.

Written comments related to the Project may be submitted by any of the following methods:

- *BLM's National NEPA Register (ePlanning) at:* <https://eplanning.blm.gov/eplanning-ui/project/2026858/510>.
- *Email:* BLM_ID_CaldwellRevisedMRP_EIS@blm.gov.
- *Mail:* Caldwell Canyon Revised Mine EIS, C/O Stantec Consulting Services Inc., 2890 East Cottonwood Parkway, Suite 300, Salt Lake City, UT 84121.

FOR FURTHER INFORMATION CONTACT: Barry Myers, project lead, at telephone (208) 559-3662; address 4350 Cliffs Drive, Pocatello, ID 83204; or email

bmyers@blm.gov. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services for contacting Mr. Myers. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION:

Purpose and Need

The purpose of the EIS is to evaluate and respond to the Revised Mine and Reclamation Plan (RMRP) submitted for the recovery of phosphate ore contained within Federal phosphate leases IDI-02, IDI-014080, and IDI-013738, and to modify leases, in accordance with the Mineral Leasing Act of 1920, as amended.

The need for the Project is to develop the phosphate ore resource in accordance with established requirements (including, but not limited to, applicable Federal and State laws and regulations, lease terms, and land use plans) using an economically viable method, and to allow P4 the ability to exercise its right under the Mineral Leasing Act to develop the leases.

Proposed Action

P4's application proposes mining of existing Federal phosphate leases IDI-02, IDI-014080, and IDI-013738, and State of Idaho Mineral Lease E07959, by constructing two open pits, partially backfilling the inactive Dry Valley Mine South Extension Panel D pit with initial overburden materials, constructing haul and access roads, installing various utility lines, and constructing water management features, monitoring wells, shop and office facilities, while implementing environmental protection measures and reclamation.

Portions of the two open pits, the North and South Pits, would extend beyond the existing Federal and State lease boundaries. To accommodate those portions of the pits that extend outside the current Federal and State leases, P4 proposes expanding their leases in accordance with 43 CFR Subpart 3510. Operations would be conducted over an estimated 40-year period and would occur on public lands administered by the BLM, on National Forest System lands, on lands administered by the Idaho Department of Lands, and on private lands.

Total disturbance for the Project would be approximately 1,832 acres, with approximately 418 acres of

disturbance having already occurred under previous approvals. The RMRP includes designs to reduce environmental impacts and to reclaim proposed disturbance. To ensure water quality requirements are met, reclamation includes a combination of earthen and synthetic reclamation cover systems.

Additional Alternatives

In addition to the Proposed Action, three action alternatives and the No Action Alternative are fully analyzed in the Draft EIS. Under Alternative 1, disturbance to public lands would be minimized by aligning the Dry Valley Area Haul Road/Access Road/Utility Corridor to avoid public lands and by not approving a Phosphate Use Permit associated with the Caldwell Canyon Service Road. Alternative 2 considers and analyzes impacts associated with not issuing the Federal lease modifications proposed by P4. Alternative 3 excludes any new disturbance and mining-related activities within designated Greater Sage-Grouse habitat to minimize impacts. The draft EIS identifies the Proposed Action as the Agency Preferred Alternative.

Public Involvement Process

The BLM will hold one virtual public meeting. The specific date of this meeting will be announced in advance through BLM's National NEPA Register (ePlanning) website <https://eplanning.blm.gov/eplanning-ui/project/2026858/510>. Information on how to register for the online meeting will be posted on the above website.

The BLM will continue to consult with Indian Tribal Nations on a government-to-government basis in accordance with Executive Order 13175 and other policies. Agencies will give due consideration to Tribal concerns, including impacts on Indian Trust Assets and treaty rights, and potential impacts to cultural resources.

The purpose of public review of the Draft EIS is to provide an opportunity for meaningful collaborative public engagement and for the public to provide substantive comments, such as identification of factual errors, data gaps, relevant methods, or scientific studies. The BLM will respond to substantive comments by making appropriate revisions to the EIS or explaining why a comment did not warrant a change.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your

personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

(Authority: 40 CFR 1506.6, 40 CFR 1506.10)

Peter Ditton,

Acting State Director.

BILLING CODE 4331–21–P

INTERNATIONAL TRADE COMMISSION

Notice of Receipt of Complaint; Solicitation of Comments Relating to the Public Interest

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has received a complaint entitled *Certain Mobile Electronic Devices, DN 3793*; the Commission is soliciting comments on any public interest issues raised by the complaint or complainant's filing pursuant to the Commission's Rules of Practice and Procedure.

FOR FURTHER INFORMATION CONTACT: Lisa R. Barton, Secretary to the Commission, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 205–2000. The public version of the complaint can be accessed on the Commission's Electronic Document Information System (EDIS) at <https://edis.usitc.gov>. For help accessing EDIS, please email EDIS3Help@usitc.gov.

General information concerning the Commission may also be obtained by accessing its internet server at United States International Trade Commission (USITC) at <https://www.usitc.gov>. The public record for this investigation may be viewed on the Commission's Electronic Document Information System (EDIS) at <https://edis.usitc.gov>. Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: The Commission has received a complaint and a submission pursuant to § 210.8(b) of the Commission's Rules of Practice and Procedure filed on behalf of Maxell, Ltd. on December 17, 2024. The complaint alleges violations of section

337 of the Tariff Act of 1930 (19 U.S.C. 1337) in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain mobile electronic devices. The complaint names as respondents: Samsung Electronics Co., Ltd. of South Korea and Samsung Electronics America, Inc. of Ridgefield Park, NJ. The complainant requests that the Commission issue a limited exclusion order, cease and desist orders, and impose a bond upon respondents' alleged infringing articles during the 60-day Presidential review period pursuant to 19 U.S.C. 1337(j).

Proposed respondents, other interested parties, members of the public, and interested government agencies are invited to file comments on any public interest issues raised by the complaint or § 210.8(b) filing. Comments should address whether issuance of the relief specifically requested by the complainant in this investigation would affect the public health and welfare in the United States, competitive conditions in the United States economy, the production of like or directly competitive articles in the United States, or United States consumers.

In particular, the Commission is interested in comments that:

(i) explain how the articles potentially subject to the requested remedial orders are used in the United States;

(ii) identify any public health, safety, or welfare concerns in the United States relating to the requested remedial orders;

(iii) identify like or directly competitive articles that complainant, its licensees, or third parties make in the United States which could replace the subject articles if they were to be excluded;

(iv) indicate whether complainant, complainant's licensees, and/or third party suppliers have the capacity to replace the volume of articles potentially subject to the requested exclusion order and/or a cease and desist order within a commercially reasonable time; and

(v) explain how the requested remedial orders would impact United States consumers.

Written submissions on the public interest must be filed no later than by close of business, eight calendar days after the date of publication of this notice in the **Federal Register**. There will be further opportunities for comment on the public interest after the issuance of any final initial determination in this investigation. Any written submissions on other issues must also be filed by no later than the
