Agricultural Marketing Service

Title: Plan for Estimating Daily Livestock Slaughter under Federal Inspection.

OMB Control Number: 0581-0050.

Summary of Collection: The Agricultural Marketing Act of 1946 (7 U.S.C. 1621-1627) (AMA), as amended, authorizes the Secretary of Agriculture "to collect and disseminate marketing information, including adequate outlook information on a market-area basis, for the purpose of anticipating and meeting consumer requirements, aiding in the maintenance of farm income, and bringing about a balance between production, and utilization of agricultural products." The collection of information in this request is based on the AMA, title II, subtitle A, sec. 203, principally, paragraphs (b), (g), and (k) that direct the Secretary of Agriculture to determine agricultural marketing costs and develop efficient marketing methods to reduce the price spread between producer and consumer; to collect and disseminate marketing information to bring about a balance between production and utilization of agricultural products; and to collect, tabulate, and disseminate agricultural marketing statistics.

Under this authority, the Agricultural Marketing Service (AMS) Livestock, Poultry, and Grain Market News (LPGMN) Division works to provide timely information of prices, supply, demands, trends, movement, and other details affecting the trade of livestock, poultry, meat, eggs, grain, and their related products, as well as locally produced and marketed products. The information requested is used to compile and disseminate market reports that provide current, unbiased information to all stakeholders in the U.S. agricultural industry.

Need and Use of the Information: AMS will collect information on estimation of the current day's slaughter at their plant(s) and the actual slaughter of the previous day. The report is used to make market outlook projections and maintain statistical data. The up-to-the-minute reports collected and disseminated by professional market reporters are intended to provide both buyers and sellers with the information necessary for making intelligent, informed marketing decisions, thus putting everyone in the marketing system in an equal bargaining position. Since the government is a large purchaser of meat, a system to monitor

the collection and reporting of data is needed. Collecting this information less frequently would hinder the timely use of this data.

Description of Respondents: Business or other for-profit; Individuals or households; Farms.

Number of Respondents: 69.

Frequency of Responses: Reporting; Weekly; Other: Daily.

Total Burden Hours: 597.
