Agricultural Marketing Service

Title: Plan for Estimating Daily Livestock Slaughter under Federal Inspection.

OMB Control Number: 0581-0050.

Summary of Collection: The Agricultural Marketing Act of 1946 (7 U.S.C. 1621-1627) (AMA), as amended, authorizes the Secretary of Agriculture "to collect and disseminate marketing information, including adequate outlook information on a market-area basis, for the purpose of anticipating and meeting consumer requirements, aiding in the maintenance of farm income, and bringing about a balance between production, and utilization of agricultural products." The collection of information in this request is based on the AMA, title II, subtitle A, sec. 203, principally, paragraphs (b), (g), and (k) that direct the Secretary of Agriculture to determine agricultural marketing costs and develop efficient marketing methods to reduce the price spread between producer and consumer; to collect and disseminate marketing information to bring about a balance between production and utilization of agricultural products; and to collect, tabulate, and disseminate agricultural marketing statistics.

Under this authority, the Agricultural Marketing Service (AMS) Livestock, Poultry, and Grain Market News (LPGMN) Division works to provide timely information of prices, supply, demands, trends, movement, and other details affecting the trade of livestock, poultry, meat, eggs, grain, and their related products, as well as locally produced and marketed products. The information requested is used to compile and disseminate market reports that provide current, unbiased information to all stakeholders in the U.S. agricultural industry.

Need and Use of the Information: AMS will collect information on estimation of the current day's slaughter at their plant(s) and the actual slaughter of the previous day. The report is used to make market outlook projections and maintain statistical data. The up-to-the-minute reports collected and disseminated by professional market reporters are intended to provide both buyers and sellers with the information necessary for making intelligent, informed marketing decisions, thus putting everyone in the marketing system in an equal bargaining position. Since the government is a large purchaser of meat, a system to monitor

the collection and reporting of data is needed. Collecting this information less frequently would hinder the timely use of this data.

Description of Respondents: Business or other for-profit; Individuals or households; Farms.

Number of Respondents: 69.

Frequency of Responses: Reporting; Weekly; Other: Daily.

Total Burden Hours: 597.

OMB Control Number: 0596–0244.

Summary of Collection: The Federal Cave Resources Protection Act (FCRPA) [Pub. The information covered in this collection applies to caves on Federal lands administered by the Forest Service. The FCRPA does not define what constitutes a “significant” cave, but it does require the Secretaries, in cooperation and consultation with each other, to issue regulations that define criteria for identification of significant caves found at (16 U.S.C. 4303(a)).

SUPPLEMENTARY INFORMATION: The Animal and Plant Health Inspection Service (APHIS) of the United States Department of Agriculture (USDA) is proposing to add a new system of records, titled APHIS Student Outreach Programs System, USDA/APHIS–26, that APHIS’ Office of Civil Rights, Diversity, and Inclusion (OCRDI) will use to facilitate the submission and review of information submitted by students and their parents or guardians as part of the application process for outreach programs such as AgDiscovery. (AgDiscovery is a summer outreach program designed to help teenagers explore careers in areas such as plant and animal science, wildlife management, and agribusiness (<https://www.aphis.usda.gov/careers/students-grads/agdiscovery>)). APHIS Student Outreach Programs challenge students to consider the importance of American agriculture, and the role USDA plays in this critical mission. Students participate in experiential learning activities on and off campus, attend workshops, lectures, laboratory, and field exercises, in addition to a variety of cultural and teambuilding activities. The maintenance of this system is conducted in a manner consistent with the guidelines established in 7 U.S.C. 2279 (Farming Opportunities Training and Outreach).

The application process for OCRDI’s outreach programs provides information needed to discover and explore a student’s interest in agriculture and provides recommendations from others who are familiar with the student’s character. That information, which is collected annually from applicants, will be used to evaluate and select the participants for APHIS Student Outreach Programs. The application process also provides the agency and participating educational institutions information required to evaluate and rate the applicants.

Individuals covered by the system include students who apply for APHIS Student Outreach Programs and their parent(s) or guardian(s).

APHIS will share information from the system pursuant to the requirements of the Privacy Act and, in the case of its routine uses, when the disclosure is compatible with the purpose for which
