POLICY JUSTIFICATION

Australia—General Tomahawk Weapons System Support Services Uplift

The Government of Australia has requested to buy services to support the Tomahawk Weapon System, including general weapons support services; logistics support management; material support; engineering technical support; management of technical data; and other related elements of logistics and program support. The estimated total cost is \$250 million.

This proposed sale will support the foreign policy and national security objectives of the United States (U.S.). Australia is one of our most important allies. The strategic location of this political and economic power contributes significantly to ensuring peace and economic stability in the

Western Pacific. It is vital to the U.S. national interest to assist our ally in developing and maintaining a strong and ready self-defense capability.

The proposed sale will allow Australia to better utilize the Tomahawk Weapon System it is procuring and ensure appropriate weapon pairing is evaluated to identify defined targets more precisely. It will also assist and contribute to Australia’s joint maritime weapon technology development, analysis, and implementation; support multiple lines of effort to enhance interoperability and interchangeability with the U.S.; and uplift joint warfighting operational effects.

The proposed sale of this support will not alter the basic military balance in the region.

The principal contractor(s) will be determined as the Government of Australia identifies its specific annual and quarterly requirements for weapons uplift support. There are no known offset agreements in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Australia.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.
