

appendix to this notice for the full scope of the *Orders*.

Continuation of the Orders on CWP From China

As a result of the determinations by Commerce and the ITC that revocation of the *Orders* would likely lead to continuation or recurrence of dumping, countervailable subsidies, and material injury to an industry in the United States, pursuant to section 751(d)(2) of the Act and 19 CFR 351.218(a), Commerce hereby orders the continuation of the *Orders*. U.S. Customs and Border Protection will continue to collect AD and CVD cash deposits at the rates in effect at the time of entry for all imports of subject merchandise. The effective date of the continuation of the *Orders* will be December 17, 2024.⁷ Pursuant to section 751(c)(2) of the Act and 19 CFR 351.218(c)(2), Commerce intends to initiate the next sunset review of the *Orders* not later than 30 days prior to the fifth anniversary of the effective date of this continuation.

Administrative Protective Order (APO)

This notice also serves as the only reminder to parties subject to an APO of their responsibility concerning the return, destruction, or conversion to judicial protective order of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with this request is a violation of the APO which may be subject to sanctions.

Notification to Interested Parties

These sunset reviews and notice are in accordance with sections 751(c) and 751(d)(2) of the Act and this notice is published pursuant to section 777(i)(1) of the Act and 19 CFR 351.218(f)(4).

Dated: December 23, 2024.

Abdelali Elouaradia,

Deputy Assistant Secretary for Enforcement and Compliance.

Appendix

The merchandise subject of these *Orders* are certain welded carbon quality steel pipes and tubes, of circular cross-section, and with an outside diameter of 0.372 inches (9.45 mm) or more, but not more than 16 inches (406.4 mm), whether or not stenciled, regardless of wall thickness, surface finish (e.g., black, galvanized, or painted), end finish (e.g., plain end, beveled end, grooved, threaded, or threaded and coupled), or industry specification (e.g., ASTM, proprietary, or other), generally known as

standard pipe and structural pipe (they may also be referred to as circular, structural, or mechanical tubing).

Specifically, the term “carbon quality” includes products in which (a) iron predominates, by weight, over each of the other contained elements; (b) the carbon content is 2 percent or less, by weight; and (c) none of the elements listed below exceeds the quantity, by weight, as indicated: (i) 1.80 percent of manganese; (ii) 2.25 percent of silicon; (iii) 1.00 percent of copper; (iv) 0.50 percent of aluminum; (v) 1.25 percent of chromium; (vi) 0.30 percent of cobalt; (vii) 0.40 percent of lead; (viii) 1.25 percent of nickel; (ix) 0.30 percent of tungsten; (x) 0.15 percent of molybdenum; (xi) 0.10 percent of niobium; (xii) 0.41 percent of titanium; (xiii) 0.15 percent of vanadium; or (xiv) 0.15 percent of zirconium.

Standard pipe is made primarily to American Society for Testing and Materials (ASTM) specifications but can be made to other specifications. Standard pipe is made primarily to ASTM specifications A-53, A-135, and A-795. Structural pipe is made primarily to ASTM specifications A-252 and A-500. Standard and structural pipe may also be produced to proprietary specifications rather than to industry specifications. This is often the case, for example, with fence tubing. Pipe multiple stenciled to a standard and/or structural specification and to any other specification, such as the American Petroleum Institute (API) API-5L specification, is also covered by the scope of the *Orders* when it meets the physical description set forth above and also has one or more of the following characteristics: is 32 feet in length or less; is less than 2.0 inches (50 mm) in outside diameter; has a galvanized and/or painted surface finish; or has a threaded and/or coupled end finish. (The term “painted” does not include coatings to inhibit rust in transit, such as varnish, but includes coatings such as polyester.)

The scope of these *Orders* does not include: (a) pipe suitable for use in boilers, superheaters, heat exchangers, condensers, refining furnaces and feedwater heaters, whether or not cold drawn; (b) mechanical tubing, whether or not cold-drawn; (c) finished electrical conduit; (d) finished scaffolding; (e) tube and pipe hollows for redrawing; (f) oil country tubular goods produced to API specifications; and (g) line pipe produced to only API specifications.

The pipe products that are the subject of these *Orders* are currently classifiable in Harmonized Tariff Schedule of the United States (HTSUS) statistical reporting numbers 7306.30.10.00, 7306.30.50.25, 7306.30.50.32, 7306.30.50.40, 7306.30.50.55, 7306.30.50.85, 7306.30.50.90, 7306.50.10.00, 7306.50.50.50, 7306.50.50.70, 7306.19.10.10, 7306.19.10.50, 7306.19.51.10, and 7306.19.51.50. However, the product description, and not the HTSUS classification, is dispositive of whether merchandise imported into the United States falls within the scope of the *Orders*.

Notice of Opportunity To Request Administrative Review; Correction

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

ACTION: Notice; correction.

SUMMARY: The U.S. Department of Commerce (Commerce) published a notice of opportunity to request administrative reviews of orders, findings, or suspended investigations with November anniversary dates in the **Federal Register** of November 1, 2024. Commerce inadvertently omitted the antidumping duty order on Certain Cut-to-Length Carbon Steel Plate (A-570-849) from the People’s Republic of China, and the period of review for that order of 11/1/2023–10/31/2024 from that notice.

FOR FURTHER INFORMATION CONTACT: Brenda E. Brown, Office of AD/CVD Operations, Customs Liaison Unit, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230, telephone: (202) 482-4735.

SUPPLEMENTARY INFORMATION:

Background

On November 1, 2024, Commerce published in the **Federal Register** the *November Opportunity Notice*.¹ In that notice, Commerce inadvertently omitted the antidumping duty order on Certain Cut-to-Length Carbon Steel Plate (A-570-849) from the People’s Republic of China, and the period of review for that order of 11/1/2023–10/31/2024 from that notice.

Correction

In the **Federal Register** of November 1, 2024, in FR Doc 2024–87338, on page 87339, correct the table under “Antidumping Duty Proceedings” for “The People’s Republic of China,” to add the antidumping duty order on Certain Cut-to-Length Carbon Steel Plate (A-570-849) from the People’s Republic of China, and the period of review for that order of 11/1/2023–10/31/2024.²

We are hereby notifying interested parties that not later than 30 days after the date of publication of this correction notice, they may request an

National Oceanic and Atmospheric Administration

[RTID 0648–XE546]

Endangered and Threatened Species; Initiation of the 5-Year Review of the Daggernose Shark (*Isogomphodon oxyrinchus*)

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; request for information.

SUMMARY: We, NMFS, announce initiation of the 5-year review of the endangered daggernose shark (*Isogomphodon oxyrinchus*). The Endangered Species Act (ESA) requires us to conduct a review of listed species at least once every 5 years to determine whether a species should be removed from the list (*i.e.*, delisted), reclassified from an endangered species to a threatened species (*i.e.*, downlisted), or reclassified from a threatened species to an endangered species (*i.e.*, uplisted). The determination must be based on the best scientific and commercial data available at the time of the review. Therefore, we request relevant information (*e.g.*, biology, threats, and conservation efforts) that has become available since our previous review of the species.

DATES: To allow us adequate time to conduct the 5-year review, we must receive your information no later than March 3, 2025. While we accept new information about any listed species at any time, information received after the date stated above may not be considered for the purposes of this review.

ADDRESSES: Submit your information electronically via the Federal eRulemaking Portal. Go to <https://www.regulations.gov> and enter NOAA–NMFS–2024–0147 in the Search box. Click on the “Comment” icon, complete the required fields, and enter or attach your comments.

Instructions: We may not consider comments or other information if sent by any other method, to any other address or individual, or received after the date stated above. All comments and information received are a part of the public record, and we will post the comments for public viewing on <https://www.regulations.gov>. All personal identifying information (*e.g.*, name, address, *etc.*) submitted voluntarily by the sender will be publicly accessible. Do not submit confidential business information, or otherwise sensitive or protected information. We will accept anonymous comments (enter “N/A” in the required fields if you wish to remain anonymous).

FOR FURTHER INFORMATION CONTACT:

Chris Parsons, NOAA Affiliate, (301) 427–8403, Chris.Parsons@noaa.gov.

SUPPLEMENTARY INFORMATION: This notice announces our initiation of the daggernose shark (*Isogomphodon oxyrinchus*) 5-year review. Section 4(c)(2) of the ESA requires us to conduct a review of listed species at least once every 5 years to determine whether species should be removed from the list, changed in status from an endangered species to a threatened species, or changed in status from a threatened species to an endangered species (16 U.S.C. 1533(c)(2)). Section 4(a)(1) of the ESA requires us to determine whether any species is an endangered or threatened species because of any of the following factors: (A) the present or threatened destruction, modification, or curtailment of its habitat or range; (B) overutilization for commercial, recreational, scientific, or educational purposes; (C) disease or predation; (D) the inadequacy of existing regulatory mechanisms; or (E) other natural or manmade factors affecting its continued existence (16 U.S.C. 1533(a)(1)). Section 4(b)(1)(A) of the ESA requires us to make the determination based solely on the best scientific and commercial data available at the time of the review and after taking into account efforts to protect the species (16 U.S.C. 1533(b)(1)(A)). Regulations in 50 CFR 424.21 require that we publish a notice in the **Federal Register** announcing species currently under active review. Based on such reviews, we determine whether a species should be delisted or reclassified (50 CFR 424.21). Any such change (*i.e.*, delisting or reclassification) would require a separate rulemaking process.

We last performed a review of the daggernose shark in 2015 prior to its listing as an endangered species under the ESA (82 FR 21722, May 10, 2017). Background information on the species

is available on the NMFS website at: <https://www.fisheries.noaa.gov/species/daggernose-shark>.

Public Solicitation of Relevant Information

To ensure that the 5-year review is based on the best scientific and commercial data available, we are soliciting information from the public, governmental agencies, Tribes, the scientific community, industry, environmental organizations, and any other interested parties. We request information that has become available since the previous review in 2015. Categories of requested information include: (1) species biology including, but not limited to, abundance, population trends, demographics, distribution, and diversity; (2) habitat conditions including, but not limited to, amount, distribution, suitability, and important features for conservation; (3) degree, nature, and trends of threats to the species and its habitats, especially those factors described in section 4(a)(1) of the ESA and listed above; (4) conservation efforts that have been implemented to benefit the species, including monitoring data demonstrating the effectiveness of such efforts; and (5) other information, data, or corrections including, but not limited to, taxonomic or nomenclatural changes and improved analytical methods for evaluating extinction risk.

If you wish to provide information for the review, please submit your information and materials electronically (see **ADDRESSES** section). We request that all information be accompanied by supporting documentation such as maps, bibliographic references, or reprints of pertinent publications.

Authority: 16 U.S.C. 1531 *et seq.*

Dated: December 20, 2024.

Lisa Manning,

Acting Chief, Endangered Species Conservation Division, Office of Protected Resources, National Marine Fisheries Service.
