Abstract: This ICR covers the information collection activities associated with the pesticide container design and residue removal requirements and containment structure requirements. With respect to the container design and residue removal requirements, the information collection activities are associated with the requirement that businesses subject to the container regulations (pesticide registrants) and repackaging regulations (pesticide registrants and refillers) maintain records of test data, cleaning procedures, certain data when a container is refilled, and other supporting information. These records are subject to both call-in by EPA and on-site inspection by EPA and its representatives. EPA has not established a regular schedule for the collection of these records, and there is no reporting. With respect to the containment structure requirements, the information collection activities are associated with the requirement that businesses subject to the containment structure regulations maintain records of the: (1) Monthly inspection and maintenance of each containment structure and all stationary bulk containers; (2) Duration over which non-stationary bulk containers holding pesticide and not protected by a secondary containment unit remain at the same location; and (3) Construction date of the containment structure. The businesses subject to the containment structure regulations include

agrichemical retailers and refilling establishments, custom blenders and commercial applicators of agricultural pesticides. The records have to be maintained by the owners and operators of such businesses and made available to inspectors to ensure that businesses are in compliance with containment requirements. These inspections are generally conducted by the states, which enforce Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) regulations through cooperative agreements with EPA.

Form number(s): None.

Respondents/affected entities: Entities potentially affected are those that are part of the regulated community affected by the container design and residue removal regulations which includes businesses that formulate pesticide products or repackage pesticide products into refillable containers. The ICR includes a list of potentially affected entities with North American Industrial Classification System (NAICS) codes provided to assist in determining potential applicability. NAICS codes identified in question 12 of the ICR.

Respondent's obligation to respond: Mandatory under FIFRA sections 3, 8, 19 and 25 (7 U.S.C. 136f, 136q, and 136w).

Estimated number of potential respondents: 23,586.

Frequency of response: On Occasion.

Total estimated burden: 180,763 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated costs: \$10,864,047 (per year), includes \$419,875 annualized capital investment or maintenance and operational costs.

Changes in the estimates: There is no change in the number of burden hours as there are no programmatic updates or changes for this ICR. The change in costs for the regulated community is \$1,830,391. The change in costs for the Agency is \$1,747. The increase in costs for both are based on BLS wage rate adjustments. There is also an increase in capital costs of \$83,975 as a result of an increase in costs for agricultural pesticide refiller. These are adjustments.

Director, Information Engagement Division.
