SUPPLEMENTARY INFORMATION:

I. Discussion

Notice is hereby given that the NRC has issued Subsequent Renewed Facility Operating License No. DPR–22 to Northern States Power Company, a Minnesota corporation (NSPM, the licensee), for Monticello Nuclear Generating Plant, Unit 1 (Monticello). NSPM is the operator of the facility. Subsequent Renewed Facility Operating License No. DPR–22 authorizes operation of Monticello by NSPM at reactor core power levels not in excess of 2,004 megawatts thermal, in accordance with the provisions of the Monticello subsequent renewed license and technical specifications. Notice is also given that the record of decision (ROD) that supports the NRC’s decision to issue Subsequent Renewed Facility Operating License No. DPR–22 is available in the “Availability of Documents” section of this document.

As discussed in the ROD and the final site-specific environmental impact statement (EIS), published as NUREG–1437, Supplement 26, Second Renewal, “Site-Specific Environmental Impact Statement for License Renewal of Nuclear Plants, Supplement 26, Second Renewal, Regarding Subsequent License Renewal for Monticello Nuclear Generating Plant, Unit 1, Final Report,” dated November 2024, the final EIS documents the NRC staff’s environmental review, including the determination that the adverse environmental impacts of subsequent license renewal for Monticello are not so great that preserving the option of subsequent license renewal for energy planning decisionmakers would be unreasonable. The final EIS conclusion is based on (1) information provided in the environmental report submitted by

NSPM, as supplemented, (2) the NRC staff’s consultations with Federal, State, local, and Tribal agencies, (3) the NRC staff’s independent environmental review, (4) the NRC staff’s consideration of public comments received during the scoping process and on the 2024 draft site-specific EIS, and (5) consideration of new and modified Category 1 and Category 2 environmental issues identified in Revision 2 to NUREG–1437, “Generic Environmental Impact Statement for License Renewal of Nuclear Plants” (August 2024). Monticello is a single-cycle, forced circulation, General Electric BWR–3, low power density boiling water reactor (BWR), located on a site situated on the southern bank of the Mississippi River in Monticello, Minnesota, approximately 35 miles northwest of Minneapolis, Minnesota. NSPM submitted its application for the subsequent renewed license, “Monticello Nuclear Generating Plant Unit 1 Subsequent License Renewal Application,” dated January 9, 2023, as supplemented by letters through February 29, 2024 (see Availability of Documents” section of this document). The NRC staff has determined that NSPM’s application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and NRC’s regulations. As required by the Act and NRC regulations in chapter 1 of title 10 of the *Code of Federal Regulations* (10 CFR), the NRC has made appropriate findings, which are set forth in the subsequent renewed license.

A public notice of the NRC’s acceptance for docketing of the subsequent renewed license application and an opportunity for a hearing was published in the **Federal Register** on March 3, 2023 (88 FR 13474). Further, a notice of intent to prepare a site-specific EIS and conduct environmental scoping was published on March 10, 2023 (88 FR 15103). On March 18, 2024, the NRC staff issued its Safety Evaluation Report concerning the Monticello subsequent license renewal application. In April 2024, the NRC staff issued a draft site-specific EIS for public comment, providing the preliminary results of the staff’s environmental evaluation of the Monticello SLR application. A notice of availability of the site-specific draft EIS was published in the **Federal Register** on April 24, 2024 (89 FR 31225). On November 15, 2024, the NRC staff issued a final site-specific EIS, providing its final evaluation of the environmental impacts of Monticello subsequent license renewal; a notice of issuance was
