 Take notice that the Commission received the following public utility holding company filings:
Docket Numbers: PH25–2–000.
Applicants: KKR & Co. Inc.
Description: KKR & Co. Inc. submits FERC 65–B Waiver Notification.
Filed Date: 12/23/24.
Accession Number: 20241223–5457.
Comment Date: 5 p.m. ET 1/13/25.

The filings are accessible in the Commission's eLibrary system (<https://elibrary.ferc.gov/idmws/search/fercgensearch.asp>) by querying the docket number.

Any person desiring to intervene, to protest, or to answer a complaint in any of the above proceedings must file in accordance with Rules 211, 214, or 206 of the Commission's Regulations (18 CFR 385.211, 385.214, or 385.206) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: <https://www.ferc.gov/docs-filing/efiling/filing-req.pdf>. For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or OPP@ferc.gov.

Dated: December 27, 2024.

Carlos D. Clay,

Acting Deputy Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. IC25–2–000]

Commission Information Collection Activities (FERC–517); Comment Request; Extension

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of information collection and request for comments.

SUMMARY: In compliance with the requirements of the Paperwork Reduction Act of 1995, the Federal Energy Regulatory Commission (Commission or FERC) is soliciting public comment on the currently approved information collection, FERC–517 (Safety of Waterpower Projects and Project Works) represented by OMB Control No. 1902–0319. There are no changes to the information collection.

DATES: Comments on the collection of information are due March 4, 2025.

ADDRESSES: You may submit copies of your comments (identified by Docket No. IC25–2–000) by one of the following methods:

Electronic filing through <https://www.ferc.gov>, is preferred.

- *Electronic Filing:* Documents must be filed in acceptable native applications and print-to-PDF, but not in scanned or picture format.

- For those unable to file electronically, comments may be filed by USPS mail or by other delivery methods:

- *Mail via U.S. Postal Service Only:* Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE, Washington, DC 20426.

- *All other delivery services:* Federal Energy Regulatory Commission, Secretary of the Commission, 12225 Wilkins Avenue, Rockville, MD 20852.

Instructions: All submissions must be formatted and filed in accordance with submission guidelines at: <https://www.ferc.gov>. For user assistance, contact FERC Online Support by email at ferconlinesupport@ferc.gov, or by phone at (866) 208–3676 (toll-free).

Docket: Users interested in receiving automatic notification of activity in this docket or in viewing/downloading comments and issuances in this docket may do so at <https://www.ferc.gov>.

FOR FURTHER INFORMATION CONTACT: Kayla Williams may be reached by email at DataClearance@FERC.gov, telephone at (202) 502–6468.

SUPPLEMENTARY INFORMATION:

Title: FERC–517 (Safety of Waterpower Projects and Project Works).

OMB Control No.: 1902–0319.

Type of Request: Three-year extension of the FERC–517 information collection requirements with no changes to the current reporting requirements.

Abstract: This information collection will assist in the assessment of the safety of waterpower projects and project works licensed by the Commission. The Commission will use the information collection activities to evaluate project-specific dam and public safety assessments, determine whether those assessments are sufficient for the protection of life, health, and property, and to ensure that project works are being maintained in an adequate condition of repair.

The information is necessary in order to determine the urgency, priority, and scope of potential safety improvements or risk reduction measures that might be needed for the protection of life, health, and property.

The following reports are required and are a part of FERC–517:

18 CFR Part 12, Subpart B (Reports and Records)

The regulations at 18 CFR 12.10(a) and (b) require applicants and licensees to report promptly to the Regional Engineer¹ any incident resulting in death or serious injury that occurs at the relevant project. Section 12.10(a) requires an oral report to the Regional Engineer by telephone of any condition affecting the safety of a project or projects works, “as soon as practicable after that condition is discovered.” Section 12.10(b) requires a written report that includes a description of the cause and location of the accident, which must be submitted within the time specified by the Regional Engineer.

The regulation at 18 CFR 12.10(b) requires a written report of any death, serious injury, or rescue. Such reports must describe any remedial actions taken or proposed to avoid or reduce the chance of similar occurrences in the future and must be verified in accordance with section 12.13.²

Section 12.10(b)(3), section 12.10(b)(2)(ii) provides that deaths that are not project-related may be reported by providing a copy of a clipping from a newspaper article, if available. Section 12.10(b)(2)(iii) provides that serious injuries and rescues that are not project-related do not require a written report.

¹ The Regional Engineer is a member of the Commission’s staff.

² Section 12.13 specifies how to verify the authenticity of a document submitted in accordance with 18 CFR part 12.

The initial report must be made by email or telephone as soon as practicable after the condition is discovered, “preferably within 72 hours.”

18 CFR Part 12, Subpart D (Review, Inspection, and Assessment by Independent Consultant)

Overview of Subpart D

Regulations at 18 CFR part 12 subpart D pertain to project safety inspections by independent consultants. These inspections sometimes are colloquially called “Part 12D inspections.” These inspections are licensee-facilitated and are in addition to the project safety inspections conducted regularly by Commission staff.

Subpart D requires two tiers of independent consultant inspections for licensed project developments that meet the criteria shown at section 12.30.

Subpart D adopted a two-tier structure that includes two types of inspections: a comprehensive assessment (CA) and a periodic inspection (PI). Each comprehensive assessment will be performed at a ten-year interval, with the periodic inspection occurring midway between comprehensive assessments. A periodic inspection will focus on a project’s performance over the previous five years, and will include a field inspection, a review of project operations, an in-depth review of monitoring data trends and behavior, and an evaluation of whether any potential failure modes are occurring. A comprehensive assessment will build on a periodic inspection with a deep dive into every aspect of a project, including a detailed review of the design basis, analyses of record, and construction history; an evaluation of spillway adequacy; a Potential Failure Mode Analysis; and a Risk Analysis.

Engineering Guidelines—Chapters 15 & 16

Chapter 15 of the Engineering Guidelines provides guidance on a Supporting Technical Information Document (STID). A STID serves as a compendium of knowledge and information about a project and greatly facilitates the review and evaluation of the safety and performance of project works by licensees, consultants, and Commission staff. The STID consists of a hard copy and a digital reference. It is required for all projects subject to 18 CFR 12D and is used for assessing the completeness and appropriateness of technical information.

The STID summarizes the project elements and details that, except in the event of detailed studies or

construction, do not change significantly over time. The digital reference (e.g., a CD, DVD, or other form of electronic media) includes a compilation of all available source material and additional supporting information, formatted so that the licensee, commission staff, or consultants can identify and retrieve the information they need. A searchable electronic version of the hard copy material must be included on the digital reference. The licensee is responsible for compiling the information for the STID and for creating and maintaining the document for use by themselves, the Part 12D independent consultants, and Commission staff.

Chapter 16 of the Engineering Guidelines requires licensees to submit a detailed Part 12D Inspection Plan prior to conducting either type of inspection (*i.e.*, a periodic inspection or comprehensive assessment) that describes the scope of the inspection, proposes an Independent Consultant Team, and establishes the proposed schedule. Section 16–3.3.1 of chapter 16 of the Engineering Guidelines provides that the Part 12D Inspection Plan must include the following information:

- Project name, FERC number, and state(s) where the project is located;
- Type of Part 12D Inspection (Comprehensive Assessment or Periodic Inspection), and a reminder that a Risk Analysis must be completed for a Comprehensive Assessment;
- A brief description of the project features;
- A proposed team of Independent Consultants, including the identification and assessment of technical disciplines to be represented on the team of Independent Consultants; the names and resumes for the Independent Consultants; a list of supporting team member roles and their intended areas of expertise; and the names and resumes of facilitators for any Potential Failure Mode Analysis or Risk Analysis as needed; and
- A schedule for Part 12D Inspection-related activities.

Under chapter 16, members of the Independent Consultant Team are required to prepare a Pre-Inspection Preparation Report to document their initial findings from their review of project documentation, instrumentation data, and other information prior to the field inspection. Chapter 16 provides an outline for this PRA activity.

Chapter 16 also provides outlines for, and describes the scope of, the periodic inspections and comprehensive assessments that are required in 18 CFR part 12 subpart D.

Chapters 17 and 18 provide additional details and licensee guidance for conducting a Potential Failure Mode Analysis and a Level 2 Risk Analysis, which are required components of a comprehensive assessment.

Independent Consultant Team Proposals and Reports

The regulations at 18 CFR 12.31(a) and 12.31(b), respectively, list specific qualifications that are required of independent consultants and independent consultant teams. The regulation at 18 CFR 12.34(a) requires that the licensee obtain written approval of the independent consultant team from the Director of the Division of Dam Safety and Inspections (D2SI) prior to performing a periodic inspection or comprehensive assessment.

The regulation at 18 CFR 12.34(b) requires that the licensee submit a detailed independent consultant team proposal to the Director of D2SI at least 180 days prior to performing a periodic inspection or comprehensive assessment. As part of this, the licensee must submit documentation of the experience and qualifications for all members of the independent consultant team, including one or more independent consultants and additional contributing members, as needed. This enables the Commission staff to evaluate the breadth and depth of the team's experience and ensure that it is commensurate with the scale, complexity, and technical disciplines of the project and type of review being performed. The Commission intends for a comprehensive assessment to require a higher level of experience and expertise than a periodic inspection, due to the broader scope of the comprehensive assessment.

The regulation at 18 CFR 12.34(c) authorizes the Director of D2SI to disapprove an independent consultant team member, regardless of demonstrated experience and qualifications, for good cause, such as having a report rejected by the Commission within the preceding five years. This provision allows the Commission to ensure that independent consultants' inspections are performed by qualified parties.

18 CFR Part 12, Subpart F (Owner's Dam Safety Program)

Overview of Subpart F

The regulation at 18 CFR 12.60 provides that subpart F applies to all licensees with dams or other project works with a high or significant hazard potential. The terms "High hazard potential" and "Significant hazard potential" and "Low hazard potential" are defined at section 12.3(b)(13).

Owner's Dam Safety Program (ODSP) Document

Section 12.62 provides that any ODSP Document that includes one or more dams or project features with a high hazard potential must designate a Chief Dam Safety Engineer.³ Other ODSPs may designate either a Chief Dam Safety Engineer or Chief Dam Safety Coordinator.⁴ Section 12.62 also requires that the ODSP must be signed by the Owner and, as applicable, the Chief Dam Safety Engineer or the Chief Dam Safety Coordinator.

The regulation at 18 CFR 12.63 requires the following additional contents of an ODSP document:

- (a) Dam safety policy, objectives, and expectations;
- (b) Responsibilities for dam safety;
- (c) Dam safety training program;
- (d) Communication, coordination, reporting, and reports;
- (e) Record keeping and databases; and
- (f) Continuous improvement;

The regulation at 18 CFR 12.64 requires any ODSP to be reviewed by the licensee's dam safety staff and discussed with senior management on an annual basis. In addition, section 12.64 requires that any findings, analysis, corrective measures, or revisions be submitted to the D2SI Regional Engineer for possible revision. This requirement applies to any licensee with a dam or other project feature with a high or significant hazard potential.

ODSP Qualification Statement for External Audit or Peer Review

The regulation at 18 CFR 12.65 applies to licensees of one or more dams or other project features classified as having a high hazard potential. Section 12.65(a) requires an independent external audit or peer review of the ODSP and its implementation. The audit or peer review is required to be

performed at an interval not to exceed five years.

Before the audit or peer review, 18 CFR 12.65(b) requires the licensee to submit to the Regional Engineer a statement of qualifications of the prospective auditor(s) or peer review team. The licensee must receive written acceptance of the statement of qualifications before performing the audit or peer review.

ODSP External Audit or Peer Review Report

The regulation at 18 CFR 12.65(c) requires the auditor(s) or peer review team to document their findings in a report. The report must be reviewed by:

- The project's owner,
- The Chief Dam Safety Engineer or Chief Dam Safety Coordinator, and
- Management having responsibility in the area(s) audited or reviewed.

Subsequently, the report on the audit or peer review must be submitted to the Regional Engineer.

ODSP Request for Extension of Time

Typically, the Commission's letters to licensees pertaining to ODSPs and ODSP audits require submittal of a plan and schedule or report within a set period of time (e.g., provide a plan and schedule within 30 days from the date of this letter). Although neither the ODSP regulations nor any of the existing ODSP guidance documents expressly contemplate extension of time requests, there are times when a licensee cannot meet that schedule and therefore files a letter with Commission staff requesting an extension of time to complete ODSP-related tasks.

*Estimate of Annual Burden:*⁵ The Commission estimates the burden and cost⁶ for this information collection as follows:

In the tables below, the burden estimates for team proposals and reports involving PIs and CAs, define a single response as the consolidated filings during the typical ten-year cycle for Independent Consultant's Safety Inspections (one PI and one CA each during the ten-year period). Therefore, the estimated average number of annual responses for the consolidated filings is averaged over the ten-year period and represented as 0.1 responses on average per year.

³ Section 12.61(a) provides that a Chief Dam Safety Engineer is the designated individual, who is a licensed engineer, who oversees the implementation of the ODSP and has primary responsibility for ensuring the safety of the licensee's dam(s) and other project features.

⁴ Section 12.61(b) provides that a Chief Dam Safety Coordinator is not required to be a licensed

engineer but has the same responsibilities as a Chief Dam Safety Engineer.

⁵ Burden is defined as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, refer to 5 CFR part 1320.

⁶ The Commission staff believes that industry is similarly situated to the Commission in terms of cost for wages and benefits. Based on FERC's current annual average cost of \$207,786 (for salary plus benefits) for a full-time equivalent, the average hourly cost is \$100/hour. Therefore, the hourly cost used in the burden calculation is \$100.

FERC-517—DIRECT AND INDIRECT ANNUAL BURDEN AND COST CHANGES

| A. Type of response | B. Number of respondents | C. Avg. number of annual responses per respondent | D. Avg. annual burden hrs. and cost per response | E. Total number of annual responses (col. B × col. C) | F. Total annual burden hrs. and cost (col. D × col. E) |

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OPPT-2020-0413; FRL-12540-01-OMS]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Toxic Substances Control Act (TSCA) Section 8(b) Reporting Requirements for TSCA Inventory Notifications (Renewal)

AGENCY: Environmental Protection Agency (EPA).
ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request, Toxic Substances Control Act (TSCA) Section 8(b) Reporting Requirements for TSCA Inventory Notifications (EPA ICR Number 2565.05 and OMB Control Number 2070-0201), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (PRA). This is a proposed extension of the ICR, which is currently approved through

January 31, 2025. Public comments were previously requested via the **Federal Register** on Tuesday, April 23, 2024. This notice allows for an additional 30 days for public comments.

DATES: Comments must be received on or before February 3, 2025.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OPPT-2020-0413, to EPA online using www.regulations.gov (our preferred method) or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.
