### International Trade Administration

[A–580–914]

#### **Certain Superabsorbent Polymers From the Republic of Korea: Notice of Court Decision Not in Harmony With the Final Determination of Antidumping Duty Investigation; Notice of Amended Final Determination; Notice of Amended Antidumping Duty Order**

**AGENCY:** Enforcement and Compliance, International Trade Administration, Department of Commerce.

**SUMMARY:** On December 17, 2024, the U.S. Court of International Trade (CIT) issued its final judgment in *Ad Hoc Coalition of American SAP Producers v. United States*, Court No. 23–00010, sustaining the U.S. Department of Commerce's (Commerce) final remand redetermination pertaining to the less-than-fair-value (LTFV) investigation of certain superabsorbent polymers (SAP) from the Republic of Korea (Korea) covering the period of investigation October 1, 2020, through September 30, 2021. Commerce is notifying the public that the CIT's final judgment is not in harmony with Commerce's final determination in that investigation, and that Commerce is amending the final determination and the resulting antidumping duty (AD) order with respect to the dumping margins assigned to LG Chem, Ltd. (LGC) and all other producers and exporters of subject merchandise.

**DATES:** Applicable December 27, 2024.

**SUPPLEMENTARY INFORMATION:**

### Background

On October 27, 2022, Commerce published its *Final Determination* in the LTFV investigation of SAP from Korea.<sup>1</sup> In its *Final Determination*, Commerce revised the model match hierarchy of the physical characteristics of the subject merchandise to use LGC's proposed centrifugal retention capacity (CRC) characteristic reporting of 4 g/g increments, and to include LGC's proposed two additional characteristics (absorbency under pressure (AUP) and permeability (PERM)) based on its finding that the alternative CRC increments and inclusion of AUP and PERM were commercially significant.<sup>2</sup> Commerce subsequently published the AD order on SAP from Korea.<sup>3</sup>

The Ad Hoc Coalition of American SAP Producers (Coalition) appealed Commerce's *Final Determination*. On March 1, 2024, the CIT remanded the *Final Determination* to Commerce to: (1) reconsider or further explain the commercial significance of the characteristics adopted into Commerce's model match hierarchy when compared to those adopted in the preliminary determination, in particular narrower 4 g/g ranges for CRC, as well as AUP and PERM, which the CIT held to be unsupported by substantial evidence in the final determination; (2) further explain whether and to what extent Commerce verified the alternative sales and cost information upon which it relied in the final determination; and (3) address the Coalition's concern that LGC's defined characteristics created a possibility of manipulation, which could result in a distorted dumping margin.<sup>4</sup>

In its final remand redetermination, issued in June 2024, Commerce determined that there is no additional information on the record that would support the finding that narrower 4 g/g ranges for CRC and the inclusion of AUP and PERM are commercially significant and should be included in the model match hierarchy.<sup>5</sup> As a result, Commerce revised the model match
