

*as defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

The Netherlands—Joint Air-to-Surface Standoff Missiles with Extended Range

The Government of the Netherlands has requested to buy one hundred twenty (120) AGM-158B/B-2 Joint Air-to-Surface Standoff Missiles with Extended Range (JASSM-ER) All-Up-Rounds; fifteen (15) AGM-158 Inert JASSMs with Test Instrumentation Kits; two (2) AGM-158 JASSM Separation Test Vehicles; one (1) AGM-158 Instrumented Test Vehicle; and two (2) JASSM Jettison Test Vehicles. Also included are AGM-158 JASSM Dummy Air Training Missiles (DATM) and containers; KGV-135A encryption devices; test and integration equipment and support; spare parts, consumables, accessories, and repair and return support; munitions support and support equipment; classified and unclassified publications and technical documentation; Contractor Logistics Support (CLS); transportation support; personnel training and training equipment; studies and surveys; U.S. Government and contractor engineering, technical, and logistics support services; and other related elements of logistics and program support. The estimated total cost is \$908 million.

This proposed sale will support the foreign policy goals and national security objectives of the United States by improving the security of a NATO Ally that is a force for political stability and economic progress in Europe.

The proposed sale will improve the Netherlands' capability to meet current and future threats by increasing its airborne, long-range, precision-strike combat capability. The Netherlands will use these systems to defend NATO Allies and deter aggression. The Netherlands will have no difficulty absorbing these articles and services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Lockheed Martin Missiles and Fire

Control, Orlando, FL. The purchaser typically requests offsets. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to the Netherlands.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 23-89

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The AGM-158B Joint Air-to-Surface Standoff Missile with Extended Range (JASSM-ER) All Up Round is a low-observable, highly-survivable, subsonic cruise missile designed to penetrate next-generation air defense systems enroute to target. The JASSM-ER is designed to kill hard, medium-hardened, soft, and area type targets. The extended range over the baseline was obtained by going from a turbo jet to a turbo-fan engine and by reconfiguring the fuel tanks for added capacity.

The AGM-158B-2 system capabilities include all the capabilities of the AGM-158B. The AGM-158B-2 configuration will have different internal components to address multiple obsolescence issues as well as subcomponent updates to position for M-Code and other potential upgrades.

2. The KGV-135A is a high-speed, general purpose encryptor/decryptor module used for wide-band data encryption.

3. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

4. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used

to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

5. A determination has been made that the Netherlands can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

6. All defense articles and services listed in this transmittal have been authorized for release and export to the Netherlands.

Washington, DC 20515

Dear Mr. Speaker:

Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, as amended, we are forwarding herewith Transmittal No. 24-14, concerning the Air Force's proposed Letter(s) of Offer and Acceptance to the Government of Italy for defense articles and services estimated to cost \$150 million. We will issue a news release to notify the public of this proposed sale upon delivery of this letter to your office.

Sincerely,

James A. Hursch
Director

3. Sensitivity of Technology

BILLING CODE 6001-FR-C

Transmittal No. 24-14

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) *Prospective Purchaser:* Government of Italy

(ii) *Total Estimated Value:*

Major Defense Equipment *	\$ 74 million
Other	\$ 76 million

TOTAL \$150 million

(iii) *Description and Quantity or Quantities of Articles or Services under Consideration for Purchase:* Foreign Military Sales (FMS) case IT-D-AAG was below congressional notification

threshold at \$22.5 million (\$9.7 million in Major Defense Equipment (MDE)) and included twenty-four (24) Guided Bomb Unit (GBU)-53/B Small Diameter Bombs-Increment II (SDB-II) All-Up-Rounds (AURs); and four (4) GBU-53/B SDB-II Captive Carry Reliability Tests (CCRTs). The Government of Italy has requested the case be amended to include an additional one hundred twenty-five (125) GBU-53/B SDB-II AURs; and eight (8) GBU-53/B SDB-II CCRTs. This amendment will cause the case to exceed the MDE and total case value notification thresholds, and thus notification of the entire program is required.

The Government of Italy has also requested a new FMS case that includes an additional twenty-four (24) GBU-53/B SDB-II AURs; and two (2) GBU-53/B SDB-II CCRTs.

The above notification requirements are combined as follows:

Major Defense Equipment (MDE):

- One hundred seventy-three (173) GBU-53/B SDB-II AURs
- Fourteen (14) GBU-53/B, SDB-II CCRTs

Non-MDE:

- Also included are SDB-II Weapon Load Crew Trainers (WLCT) and Practical Explosive Ordnance Disposal Trainers (PEST); munitions support and support

equipment; unclassified software delivery and support; spare parts, consumables and accessories, and repair and return support; modifications and maintenance support; unclassified publications and technical documentation; studies and surveys; U.S. Government and contractor engineering, technical, and logistics support services; and other related elements of logistics and program support.

(iv) *Military Department: Air Force* (IT-D-AAG, IT-D-AAH)

(v) *Prior Related Cases, if any: None*

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: None* known at this time

(vii) *Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold: See Attached Annex*

(viii) *Date Report Delivered to Congress: February 15, 2024*

* as defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Italy—Small Diameter Bomb II

The Government of Italy has requested to buy one hundred twenty-five (125) Guided Bomb Unit (GBU)-53/B Small Diameter Bombs-Increment II (SDB-II) All-Up-Rounds (AURs); and eight (8) GBU-53/B SDB-II Captive Carry Reliability Tests (CCRTs) that will be added to a previously implemented case whose value was under the congressional notification threshold. The original FMS case, valued at \$22.5 million (\$9.7 million in MDE), included twenty-four (24) GBU-53/B SDB-II AURs; and four (4) GBU-53/B SDB-II CCRTs. The Government of Italy has also requested a new FMS case that includes twenty-four (24) GBU-53/B SDB-II AURs; and two (2) GBU-53/B SDB-II CCRTs. This notification is for a combined total of one hundred seventy-three (173) GBU-53/B SDB-II AURs; and fourteen (14) GBU-53/B SDB-II CCRTs. Also included are SDB-II Weapon Load Crew Trainers (WLCT) and Practical Explosive Ordnance Disposal Trainers (PEST); munitions support and support equipment; unclassified software delivery and support; spare parts, consumables and accessories, and repair and return support; modifications and maintenance support; unclassified publications and technical documentation; studies and surveys; U.S. Government and contractor engineering, technical, and logistics support services; and other related elements of logistics and program support. The estimated total cost is \$150 million.

This proposed sale will support the foreign policy goals and national security objectives of the United States by improving the security of a NATO Ally that is a force for political stability and economic progress in Europe.

The proposed sale will improve Italy's capability to meet current and future threats by improving the Italian Air Force and Navy's F-35 weapons capabilities. It will also advance United States interoperability with NATO and the Italian Armed Forces. Italy already has the SDB-II in its inventory and will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be RTX Corporation, Arlington, VA. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Italy.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 24-14

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The GBU-53/B Small Diameter Bomb—Increment II (SDB-II) is a 250-pound class precision-guided, semiautonomous, conventional, air-to-ground munition used to defeat moving targets from standoff range. The SDB-II has deployable wings and fins and uses Global Positioning System/Inertial Navigation System (GPS/INS) guidance, network-enabled datalink (Link-16 and ultra-high frequency (UHF)), and a multi-mode seeker (millimeter wave radar, imaging infrared, semi-active laser) to autonomously search, acquire, track, and defeat a variety of moving or stationary targets, at standoff range or close in, in a variety of attack modes, in clear or adverse weather. The SDB-II employs a multi-effects warhead (blast, fragmentation, and shaped-charge) for maximum lethality against armored and soft targets. The SDB-II weapon system consists of the tactical All-Up-Round (AUR) weapon, a 4-place common carriage system, and Mission Planning System Munitions Application Program (MAP).

a. The SDB-II Captive Carry Reliability Test vehicles are an inert SDB-II configuration used for any

purpose where an inert round without telemetry or termination capability would be useful, but primarily for reliability data collection during carriage.

b. The SDB-II Weapon Load Crew Trainer (WLCT) is a mass mockup of the tactical AUR used for load crew and maintenance training. It does not contain energetics, a live fuze, any sensitive components, or hazardous material. It is not flight certified.

c. The SDB-II Practical Explosive Ordnance Disposal Trainer (PEST) is an Explosive Ordnance Disposal (EOD) training unit with sections and internal subassemblies which are identical to, or correlate to, the external hardware, sections and internal subassemblies of the tactical AUR. The PEST does not contain energetics, a live fuze, any sensitive components, or hazardous material. It is not flight certified.

2. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that Italy can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been authorized for release and export to Italy.
