Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to Trident Seafoods Bunkhouse Dock Replacement Project, Kodiak, Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of incidental harassment authorization.

SUMMARY: NMFS has received a request from Trident Seafoods Corporation (Trident) for the re-issuance of a previously issued incidental harassment authorization (IHA) with the only change being effective dates. The initial IHA authorized take of six species of marine mammals, by Level B harassment only, incidental to construction associated with the Bunkhouse Dock replacement project in Kodiak, Alaska. The project has been delayed and none of the work covered in the initial IHA has been conducted. The scope of the activities and anticipated effects remain the same, authorized take numbers are not changed, and the required mitigation, monitoring, and reporting remains the same as included in the initial IHA. NMFS is, therefore, issuing a second identical IHA to cover the incidental take analyzed and authorized in the initial IHA.

DATES: The initial IHA was effective from March 1, 2024, through February 28, 2025. Trident has requested re-issuance with new effective dates of March 1, 2025, through February 28, 2026.

ADDRESSES: An electronic copy of the final 2024 IHA previously issued to Trident, Trident's application, and the **Federal Register** notices proposing and issuing the initial IHA may be obtained by visiting <https://www.fisheries.noaa.gov/action/incidental-take-authorization-trident-seafoods-corporation-bunkhouse-dock-replacement>. In case of problems accessing these documents, please call the contact listed below (see **FOR FURTHER INFORMATION CONTACT**).

FOR FURTHER INFORMATION CONTACT: Rachel Wachtendonk, Office of Protected Resources, NMFS, (301) 427-8401.

SUPPLEMENTARY INFORMATION:

Background

Sections 101(a)(5)(A) and (D) of the Marine Mammal Protection Act (MMPA; 16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce (as delegated to NMFS) to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, a notice of a proposed authorization is provided to the public for review.

An authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s), will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses (where relevant), and if the permissible methods of taking and requirements pertaining to the mitigation, monitoring and reporting of such takings are set forth.

NMFS has defined "negligible impact" in 50 CFR 216.103 as an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.

The MMPA states that the term "take" means to harass, hunt, capture, kill or attempt to harass, hunt, capture, or kill any marine mammal.

Except with respect to certain activities not pertinent here, the MMPA defines "harassment" as any act of pursuit, torment, or annoyance which (i) has the potential to injure a marine mammal or marine mammal stock in the wild (Level A harassment); or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering (Level B harassment).

Summary of Request

On March 12, 2024, NMFS published final notice of our issuance of an IHA authorizing take of marine mammals incidental to the Bunkhouse Dock replacement project in Kodiak, Alaska (89 FR 17820). The effective dates of that IHA were March 1, 2024, through February 28, 2025. On November 6, 2024, Trident informed NMFS that the project was delayed. None of the work identified in the initial IHA (*e.g.*, pile driving and removal) has occurred. Trident submitted a request that we

reissue an identical IHA that would be effective from March 1, 2025, through February 28, 2026, in order to conduct the construction work that was analyzed and authorized through the previously issued IHA. Therefore, re-issuance of the IHA is appropriate.

Summary of Specified Activity and Anticipated Impacts

The planned activities (including mitigation, monitoring, and reporting), authorized incidental take, and anticipated impacts on the affected stocks are the same as those analyzed and authorized through the previously issued IHA.

The purpose of Trident's construction project is to remove the degraded dock and replace it with a new structure to provide safe housing and waterfront infrastructure for seafood processing. The location, timing, and nature of the activities, including the types of equipment planned for use, are within scope of those described in the initial IHA. The mitigation and monitoring are also as prescribed in the initial IHA.

Species that are expected to be taken by the planned activity include humpback whale (*Megaptera novaeangliae*), killer whale, (*Orcinus orca*), Dall's porpoise (*Phocoenoides dalli*), harbor porpoise (*Phocoena phocoena*), Steller sea lion (*Eumetopias jubatus*), and harbor seal (*Phoca vitulina*). A description of the methods and inputs used to estimate take anticipated to occur and, ultimately, the take that was authorized is found in the previous documents referenced above. The data inputs and methods of estimating take are identical to those used in the initial IHA. NMFS has reviewed recent Stock Assessment Reports, information on relevant Unusual Mortality Events, and recent scientific literature, and determined that no new information affects our original analysis of impacts or take estimate under the initial IHA.

We refer to the documents related to the previously issued IHA, which include the **Federal Register** notice of the issuance of the initial 2024 IHA for Trident's construction work (89 FR 17820, March 12, 2024), Trident's application, the **Federal Register** notice of the proposed IHA (88 FR 88874, December 26, 2023), and all associated references and documents.

Determinations

Trident will conduct activities as analyzed in the initial 2024 IHA. As described above, the number of authorized takes of the same species and stocks of marine mammals are identical to the numbers that were found to meet

the negligible impact and small numbers standards and authorized under the initial IHA and no new information has emerged that would change those findings. The re-issued 2025 IHA includes identical required mitigation, monitoring, and reporting measures as the initial IHA, and there is no new information suggesting that our analysis or findings should change.

Based on the information contained here and in the referenced documents, NMFS has determined the following: (1) the required mitigation measures will effect the least practicable impact on marine mammal species or stocks and their habitat; (2) the authorized takes will have a negligible impact on the affected marine mammal species or stocks; (3) the authorized takes represent small numbers of marine mammals relative to the affected stock abundances; and (4) Trident's activities will not have an unmitigable adverse impact on taking for subsistence purposes as no relevant subsistence uses of marine mammals are implicated by this action.

National Environmental Policy Act

To comply with the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 *et seq.*) and NOAA Administrative Order (NAO) 216-6A, NMFS must review our proposed action with respect to environmental consequences on the human environment.

Accordingly, NMFS has determined that the issuance of the IHA qualifies to be categorically excluded from further NEPA review. This action is consistent with categories of activities identified in CE B4 of the Companion Manual for NAO 216-6A, which do not individually or cumulatively have the potential for significant impacts on the quality of the human environment and for which we have not identified any extraordinary circumstances that would preclude this categorical exclusion.

Endangered Species Act

Section 7(a)(2) of the Endangered Species Act (ESA) of 1973 (ESA: 16 U.S.C. 1531 *et seq.*) requires that each Federal agency insure that any action it authorizes, funds, or carries out is not likely to jeopardize the continued existence of any endangered or threatened species or result in the destruction or adverse modification of designated critical habitat. To ensure ESA compliance for the issuance of IHAs, NMFS consults internally whenever we propose to authorize take for endangered or threatened species, in this case with the NMFS' Alaska Regional Office (AKRO).

NMFS is authorizing take of the Mexico-North Pacific distinct population segment (DPS) of humpback whale, and the western DPS of the Steller sea lion, which are listed as threatened or endangered under the ESA. The NMFS AKRO issued a Biological Opinion under section 7 of the ESA on the issuance of an IHA to Trident under section 101(a)(5)(D) of the MMPA by NMFS OPR. The biological opinion concluded that the action is not likely to jeopardize the continued existence of the listed species.

Authorization

NMFS has issued an IHA to Trident for in-water construction activities associated with the specified activity from March 1, 2025, through February 28, 2026. All previously described mitigation, monitoring, and reporting requirements from the initial 2024 IHA are incorporated.

Dated: January 15, 2025.

Kimberly Damon-Randall,

*Director, Office of Protected Resources,
National Marine Fisheries Service.*

[RTID 0648-XE619]

Marine Mammals; File No. 28233

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; extension of comment period.

SUMMARY: Notice is hereby given that the National Marine Fisheries Service is extending the public comment period associated with the notice of receipt for an application for a permit to import bottlenose dolphins (*Tursiops truncatus*) submitted by the Clearwater Marine Aquarium.

DATES: The comment period for the notice published on December 20, 2024, at 89 FR 104107, is extended. Written comments must be received on or before March 20, 2025.

ADDRESSES: The application and related documents are available online at <https://www.fisheries.noaa.gov/action/permit-application-import-5-bottlenose-dolphins-file-no-28233-clearwater-marine-aquarium>.

You may submit comments, identified by NOAA-NMFS-2024-0140, by any of the following methods:

- **Electronic Submission:** Submit electronic public comments via the Federal e-Rulemaking Portal www.regulations.gov. To submit comments via the e-Rulemaking Portal, enter NOAA-NMFS-2024-0140 in the keyword search. Locate the document you wish to comment on from the resulting list and click on the "Comment Now" icon on the right of that line.

- **Mail:** Comments on the application should be addressed to: Permits and Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; ATTN: Jolie Harrison, Chief, Permits and Conservation Division.

Instructions: Comments must be submitted by one of the above methods. All comments received are a part of the public record and will generally be posted for public viewing on www.regulations.gov without change. All personal identifying information (e.g., name, address, etc.) submitted voluntarily by the sender will be publicly accessible. Do not submit confidential business information, or otherwise sensitive or protected information. NMFS will accept anonymous comments (enter "N/A" in the required fields if you wish to remain anonymous). Attachments to electronic comments will be accepted in Microsoft Word, Excel, or Adobe PDF file formats only.

Those individuals requesting a public hearing should submit a written request to the Chief, Permits and Conservation Division via one of the methods listed above. The request should set forth the specific reasons why a hearing on this amendment would be appropriate.

FOR FURTHER INFORMATION CONTACT:

Jennifer Skidmore or Courtney Smith, Ph.D., (301) 427-8401.

SUPPLEMENTARY INFORMATION:

On December 20, 2024 (89 FR 104107), the National Marine Fisheries Service (NMFS) published notice of a permit application submitted by the Clearwater Marine Aquarium, 249 Windward Passage, Clearwater, FL 33767 (Responsible Party: James Powell, Ph.D.). The applicant is requesting to import up to five adult male bottlenose dolphins from Attica Zoological Park in Athina, Greece, to the Clearwater Marine Aquarium for public display. The requested duration of the permit is five years. In response to a request to extend the public comment period, NMFS is extending the public comment period for an additional 45 days.
