

process the data and to submit the report through DOT's electronic submission system.

In addition, the estimated total annual burden is based on the assumption that most respondents employ automated processes to record that an item enplaned is a wheelchair or scooter for the purposes of reporting data on wheelchairs and scooters to DOT. For a carrier that manually records this information, such as by having their agent type information describing a wheelchair or scooter into the airline's system, DOT estimates that the airline would spend approximately 5 seconds (.00138 hours) per item to manually enter the data.³ DOT estimates that 12,000 Wheelchairs and scooters total are recorded manually per year.

Administrative Issues

³ The Final Rule to Amend Rules Requiring Reporting of Mishandled Baggage, Regulatory Impact Analysis, October 18, 2016, estimated a data entry burden of 5 seconds per wheelchair or scooter recorded manually. See Docket No. RITA-2011-0001.
