#### SUPPLEMENTARY INFORMATION:

*Purpose:* In accordance with the Government in the Sunshine Act (Sunshine Act), Public Law 94-409, as amended (5 U.S.C. 552b), the U.S. Election Assistance Commission (EAC) will conduct an open meeting on updates from the EAC's Election Supporting Technology Evaluation Program (ESTEP) and recent pilot efforts from the Field Services Program.

*Agenda:* During the meeting, the EAC's Commissioners will lead discussions with agency staff on updates. Other panelists will include election officials and election technology vendors.

The full agenda will be posted in advance on the EAC website: <https://www.eac.gov>.

The EAC will accept written comments and questions from members of the public. If you would like to participate, please email [clearinghouse@eac.gov](mailto:clearinghouse@eac.gov) with your full name and question or comment no later than 9 a.m. ET on February 19, 2025.

*Background:* Under the authority of the Help America Vote Act of 2002 (HAVA), the EAC created the Election Supporting Technology Evaluation Program (ESTEP) to establish requirements and guidelines specific to election technologies that are not covered under the Voluntary Voting System Guidelines (VVSG), which includes electronic poll books, electronic ballot delivery systems, election night reporting systems, and voter registration systems.

As outlined in HAVA, the Field Services Program is derived from the EAC Testing and Certification division's Quality Monitoring Program, where the agency is positioned to assist states and local jurisdictions in the verification of EAC certified fielded systems on an ongoing basis. To best accomplish this, the program has a deployable, full-time staff of subject matter experts to proactively provide a combination of virtual and onsite services and training to help officials.

*Status:* This meeting will be open to the public.

### Federal Energy Regulatory Commission

[Project No. 6440-010]

#### Lakeport Hydroelectric One, LLC and New Hampshire Department of Environmental Services; Notice of Availability of Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380, the Office of Energy Projects has reviewed the application for a subsequent license to continue to operate and maintain the Lakeport Hydroelectric Project (Lakeport Project, or project). The project would be located on the Winnepesaukee River in Belknap County, New Hampshire. Commission staff has prepared an Environmental Assessment (EA) for the project.

The EA contains staff's analysis of the potential environmental impacts of the project and concludes that licensing the project, with appropriate environmental protective measures, would not constitute a major federal action that

would significantly affect the quality of the human environment.

The Commission provides all interested persons with an opportunity to view and/or print the EA via the internet through the Commission's Home Page (<https://www.ferc.gov/>), using the "eLibrary" link.
