

on the proposed rule from the public during a 60-day comment period and held a virtual public hearing on September 26, 2023, at which we also accepted public comments. On December 17, 2024, we published a final rule to reclassify the pillar coral (*D. cylindrus*) from a threatened to an endangered species on the Federal List of Threatened and Endangered Species (89 FR 101993). That final rule was based on the information in the 5-year review, peer reviews, and public comments.

On January 20, 2025, the White House issued a memorandum instructing Federal agencies to temporarily postpone the effective date for 60 days after January 20, 2025, of any rules that had published in the **Federal Register** but not yet taken effect, for the purpose of “reviewing any questions of fact, law, and policy that the rules may raise” (90 FR 8249, January 28, 2025). In accordance with this memorandum, this action delays the effective date of the final rule NMFS published on December 17, 2024, at 89 FR 101993, until March 21, 2025.

List of Subjects

50 CFR Part 223

Endangered and threatened species, Exports, Imports, Transportation.

50 CFR Part 224

Administrative practice and procedure, Endangered and threatened species, Exports, Imports, Reporting and recordkeeping requirements, Transportation.

Dated: February 12, 2025.

Samuel D. Rauch, III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No. 230316-0077: RTID 0648-XE615]

Fisheries of the Northeastern United States; Atlantic Herring Fishery; 2025 Management Area 3 Possession Limit Adjustment

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; possession limit adjustment.

SUMMARY: NMFS is implementing a 2,000-lb (907.2-kg) possession limit for Atlantic herring for Management Area 3. This is required because NMFS projects that herring catch from Area 3 will reach 98 percent of the Area’s sub-annual catch limit (ACL) before the end of the fishing year. This action is intended to prevent overharvest of herring in Area 3, which would result in additional catch limit reductions in a subsequent year.

DATES: Effective February 12, 2025, through December 31, 2025.

FOR FURTHER INFORMATION CONTACT:

Colette Tweeddale, Fishery Management Specialist, 978-281-9335.

SUPPLEMENTARY INFORMATION: The Regional Administrator of the Greater Atlantic Regional Office monitors herring fishery catch in each Management Area based on vessel and dealer reports, State data, and other available information. Regulations at 50 CFR 648.201(a)(1)(i)(B)(2) require that NMFS implement a 2,000-lb (907.2-kg) possession limit for herring for Area 3 beginning on the date that catch is projected to reach 98 percent of the sub-ACL for that area.

Based on vessel reports, dealer reports, and other available information, the Regional Administrator projects that the herring fleet will have caught 98 percent of the Area 3 sub-ACL by January 18, 2025. Therefore, effective 0001 hr local time February 12, 2025, through December 31, 2025, a person may not attempt or do any of the following: fish for; possess; transfer; purchase; receive; land; or sell more than 2,000 lb (907.2 kg) of herring per trip or more than once per calendar day in or from Area 3.

Vessels that enter port before February 12, 2025, may land and sell more than 2,000 lb (907.2 kg) of herring from Area 3 from that trip, provided that catch is landed in accordance with State management measures. Vessels may transit or land in Area 3 with more than 2,000 lb (907.2 kg) of herring on board, provided that: the herring were caught in an area not subject to a 2,000-lb (907.2-kg) limit; all fishing gear is stowed and not available for immediate use; and the vessel is issued a permit appropriate to the amount of herring on board and the area where the herring was harvested.

Also effective February 12, 2025, through 2400 hr local time, December 31, federally permitted dealers may not attempt or do any of the following: purchase; receive; possess; have custody

or control of; sell; barter; trade; or transfer more than 2,000 lb (907.2 kg) of herring per trip or calendar day from Area 3, unless it is from a vessel that enters port before February 12, 2025 and catch is landed in accordance with State management measures.

This 2,000-lb possession limit bypasses the 40,000-lb possession limit that is required when NMFS projects that 90 percent of the sub-ACL will be caught. Regulations at § 648.201(a)(1)(i)(B)(1) require NMFS to implement a 40,000-lb (18,143.7-kg) possession limit for herring for Area 3 beginning on the date that catch is projected to reach 90 percent of the herring sub-ACL for that area. Based on dealer reports, State data, and other available information, we project that 90 percent of the Area 3 sub-ACL was harvested by January 17, 2025. However, due to the high volume nature of this fishery and the progress of catch this fishing year, we projected that 98 percent of the sub-ACL in Area 3 was harvested by January 18, 2025. Implementing the 40,000-lb (18,143.7-kg) limit before the 2,000-lb (907.2-kg) limit is impracticable due to the small amount of time between the 90-percent and 98 percent catch projection dates and substantially increases the risk of exceeding the sub-ACL due to the low amount of available catch remaining under the sub-ACL. The limited time for the two different rules is logistically difficult and could result in substantial confusion. The limited time between projected dates and the relatively low available catch could also encourage significantly increased fishing effort if we first implemented the 40,000-lb (18,143.7-kg) limit in Area 3. This increase could require a quicker implementation of the 2,000-lb (907.2-kg) limit than possible. To minimize the chance of a potential sub-ACL overage occurring and to avoid incentivizing potential changes in fishing behavior that could contribute to an overage, NMFS is bypassing the 40,000-lb (18,143.7-kg) possession limit and implementing the 2,000-lb (907.2-kg) possession limit in Area 3.

Classification

This action is required by 50 CFR part 648 and is exempt from review under Executive Order 12866.

NMFS finds good cause pursuant to 5 U.S.C. 553(b)(3)(B) to waive prior notice and the opportunity for public comment because it is unnecessary, contrary to the public interest, and impracticable. Ample prior notice and opportunity for public comment on this action has been provided for the required implementation of this action. The

requirement to implement this possession limit was developed by the New England Fishery Management Council using public meetings that invited public comment on the measures when they were developed and considered along with alternatives. Further, the regulations requiring NMFS to implement this possession limit also were subject to public notice and opportunity to comment when they were first adopted in 2021. Herring fishing industry participants monitor catch closely and anticipate potential possession limit adjustments as catch totals approach Area sub-ACLs. The regulation provides NMFS with no discretion and is designed for implementation as quickly as possible to prevent catch from exceeding limits designed to prevent overfishing while allowing the fishery to achieve optimum yield.

The 2025 herring fishing year began on January 1, 2025. Data indicating that the herring fleet will have landed at least 98 percent of the 2025 sub-ACL allocated to Area 3 only recently became available. High-volume catch and landings in this fishery can increase total catch relative to the sub-ACL quickly. If implementation of this possession limit adjustment is delayed to solicit prior public comment, the 2025 sub-ACL for Area 3 will likely be exceeded; thereby undermining the conservation objectives of the Herring Fishery Management Plan (FMP). If sub-ACLs are exceeded, the excess must be deducted from a future sub-ACL and would reduce future fishing opportunities. The public expects these actions to occur in a timely way consistent with the FMP's objectives. For the reasons stated above, NMFS also finds good cause to waive the 30-day delayed effectiveness in accordance with 5 U.S.C 553(d)(3).

Authority: 16 U.S.C. 1801 *et seq.*

Dated: February 12, 2025.

Karen H. Abrams,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 240304-0068; RTID 0648-XE584]

Fisheries of the Exclusive Economic Zone Off Alaska; Pacific Cod by Catcher/Processors Using Trawl Gear in the Bering Sea and Aleutian Islands Management Area

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS is prohibiting directed fishing for Pacific cod by American Fisheries Act (AFA) trawl catcher/processors in the Bering Sea and Aleutian Islands management area (BSAI). This action is necessary to prevent exceeding the annual 2025 Pacific cod total allowable catch (TAC) allocated to AFA trawl catcher/processors in the BSAI.

DATES: Effective 1200 hours, Alaska local time (A.l.t.), February 12, 2025, through 1200 hours, A.l.t., November 1, 2025.

FOR FURTHER INFORMATION CONTACT: Andrew Olson, 907-586-7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the BSAI exclusive economic zone according to the Fishery Management Plan for Groundfish of the BSAI (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR parts 600 and 679.

The annual apportionment of the 2025 Pacific cod TAC allocated to AFA trawl catcher/processors in the BSAI is 2,923 metric tons (mt) as established by the final 2024 and 2025 harvest specifications for groundfish in the BSAI (89 FR 17287, March 11, 2024) and inseason adjustment (89 FR 105478, December 27, 2024).

In accordance with § 679.20(d)(1)(i) and (d)(1)(ii)(B), the Administrator, Alaska Region, NMFS (Regional

Administrator), has determined that the annual 2025 Pacific cod TAC allocated to AFA trawl catcher/processors in the BSAI is necessary to account for the incidental catch in other anticipated fisheries. Therefore, the Regional Administrator is establishing a directed fishing allowance of 0 mt and is setting aside the remaining 2,923 mt as incidental catch to support other anticipated groundfish fisheries. In accordance with § 679.20(d)(1)(iii), the Regional Administrator finds that this directed fishing allowance has been reached. Consequently, NMFS is prohibiting directed fishing for Pacific cod by AFA trawl catcher/processors in the BSAI.

While this closure is effective the maximum retainable amounts at § 679.20(e) and (f) apply at any time during a trip.

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is required by 50 CFR part 679, which was issued pursuant to section 304(b), and is exempt from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment would be impracticable and contrary to the public interest, as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would delay the closure of Pacific cod by AFA trawl catcher/processors in the BSAI. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of February 11, 2025.

The Assistant Administrator for Fisheries, NOAA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: February 11, 2025.
