

Atka Island and the Aleut Corporation. There are no associated radiocarbon dates for these human remains and associated funerary objects. The burial context and physical traits of the human remains are consistent with those observed for pre-contact Aleut populations. Skeletal morphology of present-day Aleut populations is similar to that of pre-contact Aleut populations and demonstrates biological affiliation between present-day Aleut groups and pre-contact populations in the Aleutian Islands. For these reasons the human remains and associated funerary objects removed Agattu Island, Amchitka Island, Shemya Island, Little Kiska Island, Nizki Island, Adak Island, Buldir Island, and Attu Island and described above are determined to be directly related to Alaska Native tribal members residing in Atka, AK today.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location or acquisition history of the human remains and associated funerary objects described in this notice.

Determinations

The USFWS has determined that:

- The human remains described in this notice represent the physical remains of 67 individuals of Native American ancestry.
- The 338 objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a connection between the human remains and associated funerary objects described in this notice and the Native Village of Atka.

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.
2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or an Indian Tribe or Native Hawaiian organization with cultural affiliation.

Repatriation of the human remains and associated funerary objects described in this notice to a requestor

may occur on or after April 18, 2025. If competing requests for repatriation are received, the USFWS must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. The USFWS is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Abstract of Information Available

Human remains representing, at least, one individual has been identified. No associated funerary objects are present. The human remains are the cranium of one individual recorded as an adolescent (age 12-15 years) of an unknown sex. Prior to 1840, the human remains were recovered by Dr. Paul Swift under unknown circumstances from an unknown location, probably Maine. Dr. Swift lived in Nantucket, where he practiced medicine, until he
