

during the use of the 3M Versaflo TR-800 or CleanSpace EX taken into or used in by the last open crosscut, or in areas where methane may enter the air current.

(l) Neither the 3M Versaflo TR-800 nor the CleanSpace EX shall be used if methane is detected in concentrations at or above 1.0 percent. When 1.0 percent or more of methane is detected while the 3M Versaflo TR-800 or CleanSpace EX is being used, the equipment shall be de-energized immediately and the equipment withdrawn outby the last open crosscut.

(m) ICG Beckley, LLC shall use only the 3M TR-830 Battery Pack, which meets lithium battery safety standard UL 1642 or IEC 62133 in the 3M Versaflo TR-800. The petitioner shall use only the CleanSpace EX Power Unit which meets lithium battery safety standard UL 1642 or IEC 62133 in the CleanSpace EX.

(n) The battery packs shall be "changed out" in intake air outby the last open crosscut. Before each shift when the 3M Versaflo TR-800 or CleanSpace EX is to be used, all batteries and power units for the equipment shall be charged sufficiently so that they are not expected to be replaced on that shift.

(o) The following maintenance and use conditions shall apply to equipment containing lithium-type batteries:

(1) Always correctly use and maintain the lithium-ion battery packs. Neither the 3M TR-830 Battery Pack nor the CleanSpace EX Power Unit shall be disassembled or modified by anyone other than persons permitted by the manufacturer of the equipment.

(2) The 3M TR-830 Battery Pack shall only be charged in an area free of combustible material, readily monitored, and located on the surface of the mine. The 3M TR-830 Battery Pack is to be charged by either:

(i) 3MTM Battery Charger Kit TR-641N, which includes one 3M Charger Cradle TR-640 and one 3M Power Supply TR-941N, or

(ii) 3M 4-Station Battery Charger Kit TR-644N, which includes four 3M Charger Cradles TR-640 and one 3M 4-Station Battery Charger Base/Power Supply TR-944N.

(3) The CleanSpace EX Power Unit is to be charged only by the CleanSpace Battery Charger EX, Product Code PAF-0066.

(4) The batteries shall not be allowed to get wet. This does not preclude incidental exposure of sealed battery packs.

(5) The batteries shall not be used, charged, or stored in locations where the manufacturer's recommended

temperature limits are exceeded. The batteries shall not be placed in direct sunlight or used or stored near a source of heat.

(p) Personnel engaged in the use of the 3M Versaflo TR-800 and CleanSpace EX PAPRs shall be properly trained to recognize the hazards and limitations associated with the use of the equipment in areas where methane could be present. Additionally, personnel shall be trained regarding proper procedures for donning Self Contained Self Rescuers (SCSRs) during a mine emergency while wearing the 3M Versaflo TR-800 or CleanSpace EX. The mine operator shall submit proposed revisions to update the Mine Emergency Evacuation and Firefighting Program of Instruction under 30 CFR 75.1502 to address this issue.

(q) Within 60 days after the PDO granted by MSHA becomes final, ICG Beckley Pocahontas Mine shall submit proposed revisions for its approved 30 CFR part 48 training plans to the Mine Safety and Health Enforcement District Manager. These proposed revisions shall specify initial and refresher training regarding the terms and conditions stated in the PDO granted by MSHA. When training is conducted on the terms and conditions in the PDO granted by MSHA, an MSHA Certificate of Training (Form 5000-23) shall be completed. Comments shall be included on the Certificate of Training indicating that the training received was for use of the 3M Versaflo TR-800 or CleanSpace EX.

(r) All personnel who shall be involved with or affected by the use of the 3M Versaflo TR-800 or CleanSpace EX shall receive training in accordance with 30 CFR 48.7 on the requirements of the PDO granted by MSHA within 60 days of the date the PDO becomes final. Such training shall be completed before any 3M Versaflo TR-800 or CleanSpace EX can be taken into or used in by the last open crosscut. The operator shall keep a record of such training and provide such record to MSHA upon request.

(s) ICG Beckley, LLC shall provide annual retraining to all personnel who shall be involved with or affected by the use of the 3M Versaflo TR-800 or CleanSpace EX in accordance with 30 CFR 48.8. The operator shall train new miners on the requirements of the PDO granted by MSHA in accordance with 30 CFR 48.5 and shall train experienced miners on the requirements of the PDO in accordance with 30 CFR 48.6. The operator shall keep a record of such training and provide such record to MSHA upon request.

(t) ICG Beckley, LLC shall post the PDO granted by MSHA in unobstructed locations on the bulletin boards and/or in other conspicuous places where notices to miners are ordinarily posted for a period of not less than 60 consecutive days.

The miners at Beckley Pocahontas Mine are not represented by a labor organization and there are no representatives of the miners at the mine. The petition is posted at the mine.

The petitioner asserts that the alternative method proposed will at all times guarantee no less than the same measure of protection afforded the miners under the mandatory standard.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of the continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, the collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of effort in obtaining information (29 U.S.C. 657).

The following section describes who uses the information collected under each requirement, as well as how they use it. The purpose of the requirements is to ensure that employers evaluate the

hazards associated with welding, cutting, and brazing and ensure that adequate measures are taken to make the process safe.

Section 1910.255(e) requires that a periodic inspection of resistance welding equipment be made by qualified maintenance personnel, and that a certification record be generated and maintained. The certification shall include the date of the inspection, the signature of the person who performed the inspection and the serial number, or other identifier, for the equipment inspected. The record shall be made available to an OSHA inspector upon request. The maintenance inspection ensures that welding equipment is in safe operating condition while the maintenance record provides evidence to workers and agency compliance officers that employers performed the required inspections.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency's functions to protect workers, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information, and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend the approval of the information collection requirements contained in the Welding, Cutting, and Brazing Standard. The agency is requesting an adjustment increase in burden from 5,619 to 5,960 hours, a difference of 341 hours. The adjustment increase is due to an increase in the number of welders, cutters, solders, and brazers in general industry going from 21,070 to 22,352 workers. The total number of responses went from 84,280 to 89,408, an increase of 5,128 responses as a result of the change in respondents.

OSHA will summarize the comments submitted in response to this notice and will include this summary in the request to OMB to extend the approval of the information collection requirements.

Type of Review: Extension of a currently approved collection.

Title: Welding, Cutting, and Brazing Standard.

OMB Control Number: 1218-0207.

Affected Public: Business or other for-profits.

Number of Respondents: 22,352.

Number of Responses: 89,408.

Frequency of Responses: On occasion.

Average Time per Response: Varies.

Estimated Total Burden Hours: 5,960.

Estimated Cost (Operation and Maintenance): \$0.
