

Biological Diversity (CBD) dated October 21, 2024, requesting that the EPA object to the issuance of operating permit no. P030–R5, issued by NMED to Harvest Four Corners, LLC, 32–9 CDP in San Juan County, New Mexico. On May 30, 2025, the EPA Administrator issued an order granting in part and denying in part the petition. The order explains the basis for the EPA's decision.

Sections 307(b) and 505(b)(2) of the CAA provide that a petitioner may request judicial review of those portions of an order that deny issues in a petition. Any petition for review shall be filed in the United States Court of Appeals for the appropriate circuitry no later than August 19, 2025.

Dated: June 10, 2025.

James McDonald,

Director, Air and Radiation Division, Region 6.

Abstract: The New Source Performance Standards (NSPS) for Beverage Can Surface Coating (40 CFR part 60, subpart WW) were proposed on November 26, 1980, promulgated on August 25, 1983, and amended on October 17, 2000. These regulations apply to each operation of the following surface coating lines in the Beverage Can Surface Coating industry: (1) exterior base; (2) over-varnished; and (3) inside spray. New facilities include those that commenced construction, modification, or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 60, subpart WW.

In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NSPS.

Form Numbers: None.

Respondents/affected entities:

Beverage can surface coating facilities.

Respondent's obligation to respond:

Mandatory (40 CFR part 60, subpart WW).

Estimated number of respondents: 46 (total).

Frequency of response: Semiannually.

Total estimated burden: 4,970 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$778,000 (per year), which includes \$96,600 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no change in hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Second, the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. Since there are no changes in the regulatory requirements and there is no significant industry growth, there are also no changes in the capital/startup or operation and maintenance (O&M) costs.

Courtney Kerwin,

Director, Information Engagement Division.
